Taltz® (ixekizumab) Now FDA Approved for Psoriatic Arthritis Patients

As of December 1, 2017, the FDA has officially approved Taltz injection 80 mg/mL for treatment of patients with active psoriatic arthritis.

Psoriatic Arthritis Patients are at Higher Risk for Cardiovascular Disease

New evidence suggests that patients with psoriasis or any related form of the condition, such as psoriatic arthritis, have a higher risk of experiencing a cardiovascular disease event (CVD) compared to non-afflicted individuals.
